The world "Emergency" Can be split as Emerge and Urgency. It is a situation in which each and every medical practitioner comes across some or the other time.

In today's advancing world updated knowledge is must for a good practice . For this very purpose NIMA an association is supporting a task taken up by Oasis Institute of Health Sciences to put a step forward by starting PGDEMS course.

Dr. Mrs. Pooja Kadam who has tremendous practical and theoretical knowledge in the same field is starting the course for health professionals from June 2005. Our best wishes and compliments to Oasis Institute of Health Sciences

Dr. Chandrakant G. Kolte
